Professional summary

Full-Stack Software Engineer with 3+ years of professional experience in the the end-to-end design, development, and evolution of high-performance, scalable web applications, combining a strong focus on intuitive user interfaces with robust application logic and reliable integration with complex enterprise systems.

I have experience working with modern front-end ecosystems and microservices-based architectures, paying particular attention to clean code, component reusability, testing, performance optimization, and long-term maintainability.

Professional experience

Mar 2023 Now	Software Engineer Deloitte, Naples - Design and development of scalable web applications, with a strong focus on fintech solutions and business-critical digital products - Front-end development with JavaScript, TypeScript, and Angular, building responsive, maintainable, and user-focused interfaces - Back-end development with Java, Spring Boot, and SQL/NoSQL databases, implementing robust APIs, data models, and integration logic - Cross-functional team collaboration in DevOps-oriented environments, contributing to continuous delivery, code quality, and shared ownership
Sep 2022 Feb 2023	Software Engineer NoonTalents, Naples - Development of user interfaces with JavaScript, TypeScript, and React, focusing on usability, responsiveness, and maintainable component-based architectures - Implementation of REST APIs with C#, .NET, and SQL databases, supporting reliable data access, business logic, and application integrations - Collaboration within Agile teams, participating in daily stand-up meetings and managing tasks, priorities, and delivery workflows through Jira

Technical skills

Front-End Angular, React, HTML, CSS, Sass, Bootstrap, Tailwind CSS, PrimeNG, Material-UI	Back-End Spring, .NET, Node.js, MySQL, MongoDB
Languages JavaScript, TypeScript, Java, C#, C, Python	Tools & DevOps Git, Jenkins, Jira, Claude Code, Codex

Education

2020 2022	Master's Degree in Computer Science – University of Salerno - Grade: 110/110 with honors - Thesis: Identifying cause-effect relationships in ECA rules using transfer learning techniques
2016 2020	Bachelor's Degree in Computer Science – University of Salerno - Grade: 109/110 - Thesis: Implementation of heuristics for data imputation algorithms
