I am a full-stack software developer specializing in front-end development, with solid experience in the Fintech sector. I have contributed to the design and development of high-performance, scalable web applications, taking care of both user interface implementation and application logic, as well as integration with complex systems.

Throughout my career, I have worked with modern technologies and microservices-based architectures, focusing on code quality, maintainability, and user experience. Passionate about new technologies, I enjoy experimenting, continuously improving my skills, and staying up to date with the latest industry trends.

Skills

Programming languages

JavaScript, TypeScript, C, C#, Java, Python

Libraries and frameworks

React, Angular, Next.js, Express, ASP.NET, Spring Boot

Design

HTML, CSS, Sass, Bootstrap, Material-UI, DevExtreme, PrimeNG, PrimeFlex

Other

Git, SQL and NoSQL databases, Penetration testing and vulnerability assessment, Cryptography, Agile/Scrum methodology

Work experience

MARCH 2023 - NOW

Software engineer / Deloitte, Naples

- Design and development of web applications, particularly in the fintech sector.
- Front-end development, using JavaScript, TypeScript and Angular.
- Back-end development with Java, Spring Boot and SQL database.
- Team collaboration through the DevOps methodology.

SEPTEMBER 2022 – FEBRUARY 2023

Software engineer / NoonTalents, Naples

- Creation of user interfaces using JavaScript, TypeScript and React.
- Implementation of REST API using C#, ASP.NET and SQL database.
- Collaboration in Agile environment, with daily stand-up meetings and work management through Jira.

Education

FEBRUARY 2020 – DECEMBER 2022

Master's degree in computer science / University of Salerno, Fisciano (SA)

Final vote: 110/110 cum laude

Thesis: Identification of cause-effect relationships in ECA rules using Transfer Learning techniques

- Cybersecurity
- Data security
- Cryptography
- Machine learning
- Cloud computing

SEPTEMBER 2016 – FEBRUARY 2020

Bachelor's degree in computer science / University of Salerno, Fisciano (SA)

Final vote: 109/110

Thesis: Implementation of heuristics for data imputation algorithms

- Software development
- Software engineering
- Object-oriented programming
- Distributed programming
- Mobile programming
- Algorithms design
- Operating systems
- Networks
- Database management

Languages

Mother tongue

Italian

Others

English (B2)

Soft skills

Excellent relational skills, propensity for teamwork, problem-solving, organization and precision, good ability to adapt and manage stress, constant learning

I authorize the processing of personal data contained in my curriculum vitae based on Legislative Decree 196/2003, coordinated with Legislative Decree 101/2018, and EU Regulation 2016/679.
